

Visit the headwaters of a river that
you know (via google earth)

Have a look around &
print out some pictures (10-100+)
of the rocks, hills, land,
& mountains around the headwaters.

Close your eyes to see that this big
place erodes slowly & the
river carries it.

Cut the photos into confetti somehow,
throw the bits forth.

Let it flow & fall all around your living room.

Let it eddy & swirl for one week.

What patterns & movements do you notice?
